

Standard Operating Procedure

Preventive Screening, Immunisation Advice and Referral

«Hospital Name» — Supports AAC.11.b, AAC.11.c, AAC.11.d

SOP No.	[Hospital to define]	Version	1.0
Effective Date	_____	Review Frequency	Annual, or on change
Prepared By	Quality Coordinator Name: _____ Signature: _____		
Approved By	Medical Superintendent Name: _____ Signature: _____		

1. Purpose

This SOP describes how «Hospital Name» screens patients for non-communicable diseases and mental health concerns, advises immunisation, and refers or intervenes on a positive finding.

2. Scope

Applies to treating doctors, nurses, and clinical staff delivering preventive and promotive health services within the hospital's defined scope.

3. Responsibility

Treating Doctor / Nurse: applies screening criteria, advises the patient, and documents the outcome.

Referring Clinician: refers a positive screen for appropriate intervention.

4. Procedure

4.1 Non-communicable disease screening

1. Apply the hospital's defined, age-appropriate NCD screening criteria for the patient's age and risk profile.
2. Document whether screening was advised, and whether the patient accepted or declined it.

4.2 Mental health screening

1. Use a validated screening tool (e.g. PHQ-9) where applicable and available. The PHQ-9 is a validated 9-item depression screening tool — see Section 8, Reference 1.
2. On a positive screen, document appropriate advice, referral, or intervention — never leave a positive screen without a documented next step.

4.3 Immunisation

1. Follow the Universal Immunisation Programme schedule for every neonate and paediatric patient, including catch-up doses for missed vaccines — see Section 8, Reference 2.
2. Advise evidence-based adult immunisation where applicable, and document whether it was administered.
3. Log every immunisation given in the immunisation register.

5. Records

Supported by Records 2–8 of the AAC.11 Required Records pack.
