

Standard Operating Procedure

Laboratory Report Recall and Amendment

«Hospital Name» — Supports AAC.6.i

SOP No.	[Hospital to define]	Version	1.0
Effective Date	_____	Review Frequency	Annual, or on change
Prepared By	Quality Coordinator Name: _____ Signature: _____		
Approved By	Medical Superintendent Name: _____ Signature: _____		

1. Purpose

This SOP describes how «Hospital Name» recalls or amends a laboratory report, ensuring no incorrect report remains in use anywhere in the hospital.

2. Scope

Applies to any laboratory report found to be incorrect after issue, whether generated in-house or outsourced.

3. Responsibility

Laboratory In-Charge: authorises every recall and confirms full withdrawal before closing the case.

4. Procedure

1. The moment an incorrect report is identified, log it in the Recall / Amendment Log with the reason.
2. Withdraw the recalled report from every location it could exist — clinical areas, the medical record, the LIS, and the HIS. Do not leave a superseded copy findable anywhere.
3. Issue the amended report with a clear notice that it supersedes the earlier version, where the earlier report was already given to the patient or clinical team.
4. Open a CAPA record for the root cause of the error and track it to closure.

5. Records

Supported by Records 25–27 of the AAC.6 Required Records pack.

6. Related Documents

- HCO_AAC_6_v2_REWRITE_DRAFT — AAC.6 policy

7. Review

Reviewed annually, or sooner after a recurring recall pattern.
