

Standard Operating Procedure

Imaging Report Recall and Amendment

«Hospital Name» — Supports AAC.8.h

SOP No.	[Hospital to define]	Version	1.0
Effective Date	_____	Review Frequency	Annual, or on change
Prepared By	Quality Coordinator Name: _____ Signature: _____		
Approved By	Medical Superintendent Name: _____ Signature: _____		

1. Purpose

This SOP describes how «Hospital Name» recalls or amends an imaging report, ensuring no incorrect report remains in use anywhere in the hospital.

2. Scope

Applies to any imaging report found to be incorrect after issue, whether generated in-house, outsourced, or via teleradiology.

3. Responsibility

Imaging In-Charge: authorises every recall and confirms full withdrawal before closing the case.

4. Procedure

1. The moment an incorrect report is identified, log it in the Recall / Amendment Log with the reason.
2. Withdraw the recalled report from every location it could exist — clinical areas, the medical record, the RIS, and the HIS.
3. Issue the amended report with a clear notice that it supersedes the earlier version, where the earlier report was already given to the patient or clinical team.
4. Open a CAPA record for the root cause of the error and track it to closure.

5. Records

Supported by Records 22–24 of the AAC.8 Required Records pack.

6. Related Documents
