

Standard Operating Procedure

Emergency Medication Sourcing — Pharmacy Closed or Stock-Out

«Hospital Name» — Supports MOM.1.d

SOP No.	[Hospital to define]	Version	1.0
Effective Date	_____	Review Frequency	Annual, or on change
Prepared By	Quality Coordinator Name: _____ Signature: _____		
Approved By	Medical Superintendent Name: _____ Signature: _____		

1. Purpose

This SOP describes how «Hospital Name» sources a needed medication when the pharmacy is closed or a stock-out occurs, without delaying patient care.

2. Scope

Applies to every clinical area, at any hour.

3. Responsibility

Duty Nurse / Doctor: identifies the need and follows the sourcing sequence; the Pharmacy In-Charge reviews usage the next working day.

4. Procedure

1. Check the ward/unit emergency medication stock first, if the medication is on the emergency list.
2. If not available there, access the night emergency cabinet or equivalent after-hours store, per the hospital's defined access process.
3. If still unavailable, contact the on-call pharmacist or the designated after-hours authority for direction — borrowing from another unit, an emergency purchase, or an alternative agent.
4. Document what was sourced, from where, and who authorised it, in the after-hours/stock-out log.
5. Replenish whatever was used or borrowed at the next opportunity, and inform the Pharmacy In-Charge the same day.

5. Records

Supported by Records 5 and 6 of the MOM.1 Required Records pack.

6. Related Documents

- HCO_MOM_1_v2_REWRITE_DRAFT — MOM.1 policy

7. Review

Reviewed annually, and immediately after any delay-related incident.
