### 1. Purpose

This SOP describes how «Hospital Name» reconciles a patient's medications at every transition point, so nothing is accidentally omitted, duplicated, or continued in error.

### 2. Scope

Applies at all three mandatory transition points: admission, transfer between wards or departments, and discharge.

### 3. Responsibility

**Treating Doctor / Nurse:** completes and documents reconciliation at each transition point, and communicates it at handover.

### 4. Procedure

#### 4.1 At admission

1. Take a best-possible medication history — every medication the patient was taking before admission, including over-the-counter and herbal products.
2. Compare the home medication list against the admission orders and document any discrepancy.

#### 4.2 At transfer

1. Reconcile the current medication list against the new unit's orders whenever a patient moves between wards or departments.
2. Communicate the reconciled list at verbal handover, not only in writing.

#### 4.3 At discharge

1. Reconcile the discharge medication list against both the admission medications and everything prescribed during the stay.
2. Explain every change from the patient's pre-admission medications to the patient or family, and document that this was done.

### 5. Records

Supported by Record 6 of the MOM.4 Required Records pack: Medication Reconciliation Record.

## 6. Related Documents

- HCO\_MOM\_4\_v2\_REWRITE\_DRAFT — MOM.4 policy

## 7. Review

Reviewed annually, and immediately after any adverse event linked to a reconciliation gap.
