

Standard Operating Procedure

Nursing Care Quality Monitoring and Competency Evaluation

«Hospital Name» — Supports PSQ.2.i

SOP No.	[Hospital to define]	Version	1.0
Effective Date	_____	Review Frequency	Annual, or on change
Prepared By Quality Coordinator Name: _____ Signature: _____			
Approved By Medical Superintendent Name: _____ Signature: _____			

1. Purpose

This SOP describes how «Hospital Name» monitors and improves the quality of nursing care through nursing audits and competency evaluation.

2. Scope

Applies to all nursing staff and key nursing procedures, including medication administration, peripheral and intravenous cannula placement, and tracheostomy care.

3. Responsibility

Nursing Head: schedules audits/competency evaluations and reviews results.

Charge Nurse: conducts witnessed demonstrations or administers written questionnaires.

4. Procedure

1. Identify key nursing procedures requiring monitoring (at minimum: medication administration, peripheral/IV cannula placement, tracheostomy care).
2. Evaluate competency using either a written questionnaire or a witnessed demonstration — for a hands-on procedure such as cannulation, a witnessed demonstration is the more reliable method.

3. Identify key performance indicators reflecting excellence in nursing care (for example, first-attempt cannulation success rate, medication administration error rate) and integrate them with the hospital's overall QI programme.
4. Where a nurse does not demonstrate competency, arrange supervised practice and re-evaluate before the nurse performs the procedure unsupervised.
5. Document every audit/evaluation and its result in the Nursing Audit & Competency Evaluation Record (Record 10).

5. Records

Supported by the Nursing Audit & Competency Evaluation Record (Record 10) of the PSQ.2 Required Records pack.

6. Related Documents

Policy on Quality Improvement Programme (HCO/PSQ/POL/02) — PSQ.2 policy, Section 3.9 (nursing-care quality)

7. Review

Reviewed annually, or immediately after a nursing-care-related incident reveals a gap.
